

For Immediate Release

#FutureHack Announces Slovenian Prime Minister Gives Most Inspirational Award at First Ever Hackathon at Davos During World Economic Forum

Davos, Switzerland- (Jan 29, 2018)

Future of Humanity, in partnership with the Government of Slovenia, today announced the winners of the Most Inspirational category of the #FutureHack Hackathon, the first ever to be held at Davos World Economic Forum

Among the almost twenty teams which presented their resulting projects on January 25th, 2018, two teams claimed the Most Inspirational Award: Liter of Light from Davos, and Cherr.io from Slovenia.

Liter of Light (<http://www.literoflight.org>) is a global, grassroots movement committed to providing affordable, sustainable solar light to people with limited or no access to electricity.

Cherr.io (www.cherr.io) creates a global donation platform with blockchain-powered ecosystems supported by smart contracts.

The teams will receive \$25,000 (USD equivalent in tokens) each in order to scale. Slovenian Prime Minister Miro Cerar Phd gave the award for the Most Inspirational Slovenian Prize at Davos, saying:

"I am pleased to note that Slovenian star-users have penetrated the world's top in this field. The Government will continue to encourage them and create a more favorable business environment for their operation."

Judges, ranging from Tom Starks of Zurich-based Crypto Valley Association to Thessy Mehraïn from New York-based Consensusys, were enthralled by the outstanding quality of the projects resulting from the 2-day event, under the worst blizzard in 70 years.

They will now take the next week to complete a thorough analysis of the projects, along with a code review from Consensusys engineers, to announce the Best of Slovenia prize in Slovenia by the Slovenian Government, and best of Davos Prize in Switzerland, on February 7, 2018.

Futurehack hackathon focuses on Social Impact and Partnerships to demonstrate that blockchain projects can be compelling solutions for the United Nations SDGs for the future of humanity.

About FutureHack

#FutureHack, an initiative of the non-profit Future Of Humanity, promotes the use of technology to better humanity. The hackathon assembles teams of thinkers, developers, designers, and social policy experts to apply new technologies to create solutions for United Nations Sustainable Development Goals (SDGs), and thus address some of our most pressing global issues.
